Doc Ref: D15/378904

15 April 2015

To: All Design IoA Holders and Organisations

Update of Design Approval Procedures Manual

CASA has released Advisory Circular (AC) 21-12 in respect to "Classification of Design Changes". This AC provides detail of the current CASA policy in classification of design changes and amends the previous policy of using EASA guidance material.

Within 30 days of this letter, please update your Design Approval Procedures Manual (DAPM) to reflect the process as provided in CASA AC 21-12 and remove any reference to the EASA guidance material in the classification of Design Changes.

Please provide an electronic copy of your updated DAPM to:
Aircraft.certification@casa.gov.au

Yours sincerely

A handwritten signature in dark ink, appearing to read 'Peter Nikolic'.
