

# Australian Club Class Nationals

## ***Eligible Gliders, season 2007/2008***

This list is intended to conform with the gliders permitted in International Club Class at the time of the competition. At this time, the range of European handicaps included is from .96 to 1.07. The list has been reduced for simplicity, to only include gliders known to be normally flying in Australia and included in the Australian Handicap List.

Should any pilot wish to enter Club Class in a glider eligible for International Club Class which is not in this list, it will be permitted. The Handicap Committee will need to determine the appropriate handicap and reference weight that will apply.

If a glider is not in the IGC List, it can be added to the Australian eligibility list with the approval of the NCC, provided that its performance lies within the range of glider performances already in the list.

Astir CS/77	Janus A & B
ASW15B	Kestrel 17
ASW19	LS1
ASW20 (except ASW20B)	LS3 and LS3A
ASW24	LS4 and LS4A
Cobra	LS7
DG100	Mini Nimbus
DG200	Mosquito
DG202	Open Cirrus
DG300	Open Libelle
